

RENEWABLE RESOURCES

Selected **SUBJECT HEADINGS** for ILink catalog

agricultural industries	landscape architecture
agriculture-environmental aspects	livestock
agriculture and state	pests-control
aquaculture	renewable energy sources
biosphere	renewable natural resources
environmental policy	sustainable agriculture
global warming	sustainable development
horticulture	veterinary medicine

SELECTED LIBRARY WEB DATABASES

Available only to UL users; some databases are accessible from home with logon ID and password. Inquire at the Reference Desk. Access from Dupre Library's Reference Department web page:

<http://library.louisiana.edu/Ref/Databases/>

Academic Search Premier, 1975 -- .

The world's largest academic multi-disciplinary database, provides full text for nearly 4,000 scholarly publications, including full text for more than 3,100 peer-reviewed journals; daily updates.

Agricola, 1979 -- .

This bibliographic database provides more than 2.5 million citations from the U.S. Department of Agriculture's National Agricultural Library; offers a variety of source types related to agriculture.

Biological Abstracts, 1995 -- .

Biological Abstracts, produced by BIOSIS, is a complete collection of bibliographic references to life science journal literature published internationally.

BIOSIS Previews (five-year currency).

A comprehensive biological sciences database, updated weekly, it combines the content from Biological Abstracts and Biological Abstracts/RRM (Reports, Reviews, Meetings), thus providing approximately 2,700,000 records from nearly 5,000 life sciences journals and non-journal literature.

Science Citation Index Expanded (via Web of Knowledge), 1973--.

A multidisciplinary index, with searchable author abstracts, covering the journal literature of the sciences. It indexes more than 5,700 major journals across 164 scientific disciplines, covering approximately 2,100 more journals than its SCI print and CD_ROM counterparts, with all cited references captured; updated weekly.

Scopus, mid-1960s-- .

Scopus is an abstract database covering 25 million abstracts from over 14,000 titles across 4,000 international publishers from Elsevier. Scopus is a multidisciplinary (scientific, technical, medical and social science literature) navigational tool that contains records going back to the mid 1960s.
