New & Improved Credo Reference

Short video tour of the refreshed platform from Credo Reference

Transcript

Narrator: Credo Reference is the ideal place for students looking to take those first few steps in academic research. Starting with citable background information on any subject, Credo's award-winning list of full-text reference titles are selected from over 100 academic publishers.

Students can uncover related terms and topics with our mind map, find current fact-based information on controversial or politically charged issues, and browse more than 400,000 images to support their research in Credo Reference. Then, once they've built a strong foundation on their topic, Credo points them toward the next steps by seamlessly opening pathways to your library's other preferred databases.

Students can find our content on the Credo Reference platform, or you can bring the content to them, find Credo in your library's discovery system, or library catalog, or embed our articles and mind maps into your learning management systems or LibGuide.

Log in today and begin your research with confidence.
