Audrey gets funding assist

The Audrey Hotel, nestled in the heart of Abbeville's business district, is slated for a facelift, compliments of the federal government's Coastal Zone Management program and some deft maneuvering on the part of several local legislators.

The city received word this week that over $400,000 in CZM funds will be allocated for renovation of the structure.

Initial construction phases will focus on revamping lower levels of Audrey to accommodate city operations.

City hall and court, plus the major services and city operations, will headquarter here once construction is complete.
