LUMBER MILL NEAR THE RIVER

Tactical Parish Once Called ‘Italy of America’

Editor's Note: The following is a story which appeared in the publications 'The American Wool, Cotton and Financial Reporter', Boston, Mass. It was written by an unnamed reporter.

LAKE CHARLES, Oct. 30, 1965—We are at present in the growing city of Lake Charles in southwestern Louisiana. Having heard and read so much of this section of the country, termed “the ‘Italy of America,’” we came to the conclusion that if our trip through the “New South” we would expect to find that it had been truly described and ascertain what the attraction is, for people from every direction are moving in and filling up the country.

As a fact of the South, one parish alone, Calcasieu, has added over 8,000 to its population since the last census, and added over 8,000 to its population since the last census, and added over 8,000 to its population since the last census, and added over 8,000 to its population since the last census. This section personally as written by an unnamed reporter.

Where is this country? On the map, Mississippi and Alabama are shown in light blue, and the adjacent Atlantic coastal areas are shown in light blue. But Lake Charles, which is about 12 miles west of the Mississippi River, is not shown on the map.

The region is a section of the Great Plains, where the Mississippi River flows into the Gulf of Mexico. About 75 miles north, it is called southwestern Louisiana, and the climate is a tropical one, with high temperatures and high humidity. The area is rich in natural resources, including timber, natural gas, and oil.

The town of Lake Charles is located on the Calcasieu River, which is a tributary of the Mississippi River. The river is navigable for about 100 miles, and shipping is an important industry in the area. The town has a population of about 20,000.

The area is known for its mild climate, with average temperatures ranging from 50 to 70 degrees Fahrenheit. The area is also known for its seafood, with shrimp and oysters being the most popular. The town is also known for its oil production, with the McNeese State Oil Field being one of the largest in the state.

A large portion of the lumber produced in the Calcasieu Parish is shipped to other parts of the state, and also to other states. The lumber is used in building homes and other construction projects. The area is also known for its seafood, with shrimp and oysters being the most popular. The town is also known for its oil production, with the McNeese State Oil Field being one of the largest in the state.
