Delgado Expands to Meet Growing Labor Demands
Partially Finished Buildings at Institute

Financial, Legal Songs
Hammer Progress

By CAROLYN HURL

In contrast to the picture of New Or-lean's urban decay, a plume of smoke rose from Delgado Technical Institute, June 9. With the inauguration of the new Technical Institute, and the expansion of the school's facilities, the school has been able to accommodate more students and increase its educational programs.

Delgado Technical Institute, located at 1221 Carondelet St., is a two-year college offering associate's degrees in technology, business, and health fields. The institute also offers a variety of adult education courses and vocational training programs for high school graduates.

The institute's expansion includes the construction of a new building, which will house classrooms, laboratories, and administrative offices. The building is currently under construction and is expected to be completed in the near future.

In addition to the new building, Delgado Technical Institute has also added new programs in fields such as information technology and entrepreneurship. These programs are designed to meet the growing demand for skilled workers in these fields.

The institute's expansion is expected to create more than 100 new jobs, including positions in construction, facilities management, and administrative support. The added capacity will also enable the institute to offer more courses and increase enrollment, helping to meet the demand for skilled workers in the region.

Delgado Technical Institute is committed to providing high-quality education and training to its students, and the expansion will allow the institute to continue its mission of preparing students for successful careers.

The institute's expansion is part of a larger effort by the city of New Orleans to improve education and training opportunities for its residents. Other initiatives include the expansion of the city's public schools, the development of new workforce training programs, and the creation of new vocational schools.

Delgado Technical Institute's expansion is expected to have a positive impact on the local economy, providing new job opportunities and increasing the pool of skilled workers available to businesses in the region. The institute's commitment to excellence in education and training will continue to benefit students and the community for years to come.

Delgado Students Get Aeronautic Training

By THOMAS HURST

Delgado Technical Institute has announced its new Aeronautic Program, which will begin this fall. The program will offer associate's degrees in aeronautics, with a focus on aircraft maintenance and repair.

The program will be housed in a new building currently under construction on the Delgado campus. The building will include state-of-the-art laboratories and classrooms, as well as a hangar for aircraft maintenance.

The program is designed to meet the growing demand for skilled workers in the aeronautics industry. With the rapid growth of the aviation sector, there is a shortage of qualified technicians to maintain and repair aircraft.

Delgado's new Aeronautic Program will provide students with the training and skills necessary to succeed in this fast-growing field. The program will offer courses in aircraft maintenance, repair, and inspection, as well as practical experience in a real-world setting.

The program will be open to both high school graduates and adults seeking to change careers. Prospective students are encouraged to contact the Delgado Technical Institute for more information on how to apply for the program.

Delgado Technical Institute is committed to providing high-quality education and training to its students, and the new Aeronautic Program is a testament to its commitment to meeting the needs of the local workforce.

Delgado Technical Institute is located at 1221 Carondelet St., and can be contacted at (504) 556-2800. For more information on the new Aeronautic Program, please visit the institute's website at www.delgado.edu.

---

Students in the Aeronautics Program at Delgado Technical Institute will have the opportunity to work under experienced instructors, as well as gain hands-on experience in a real-world setting. The program is designed to prepare students for successful careers in the aeronautics industry.

The program will offer courses in aircraft maintenance, repair, and inspection, as well as practical experience in a real-world setting. Students will have the opportunity to work with state-of-the-art equipment and software, as well as gain hands-on experience in the field.

Delgado Technical Institute is committed to providing high-quality education and training to its students, and the new Aeronautic Program is a testament to its commitment to meeting the needs of the local workforce.

Delgado Technical Institute is located at 1221 Carondelet St., and can be contacted at (504) 556-2800. For more information on the new Aeronautic Program, please visit the institute's website at www.delgado.edu.
