As promised here are more furniture plans. Last month we presented the plans of nine of the Calcasieu Parish buildings; this month we show the four largest buildings in the project.

Our main planning goals for a library are:
- Clear traffic pattern
- Efficient density without crowding
- Flexibility
- Interesting, not contrived, spaces
- Marketability of literature and library services
- Maximum advantage of views and fenestration
- Maximum staff supervision of users
- Optimum compromise between original building program and pragmatic constraints
- Proper adjacencies among departments and collections
- Seating within the collection without disruption of collection organization
- Simple collection organization
- Staff efficiency and comfort
- Variety of user seating, appropriate to facility

David Michaels is a library design consultant based in Alexandria, Virginia.
