Basket weavers, wood sculptors, and other artists are known for their craftsmanship.

Duhon, who was imprisoned for 15 years, has spent the past three years building a replica of an Acadian house.

The model is a reproduction of an Acadian house, which is one of the earliest types of houses built in the United States. Duhon, who is now serving a life sentence for murder, is using the house as a form of therapy and has spent hundreds of hours on its construction.

The model is made of wood and is highly detailed. It features a gabled roof, a front porch, and a steep exterior slope. The house is designed to look like an Acadian house from the 18th century.

Duhon's model is a tribute to the woodworking and craftsmanship skills of the Acadian people.

After three years of hard work, Duhon has completed the model. It is now on display at a local museum.

Duhon's model is a testament to the power of art and creativity to heal and inspire.

It is a reminder of the resilience of the human spirit and the importance of keeping alive the traditions and culture of our past.
