The Louisiana Economic Development District (LEED) has awarded a $400,000 grant for the construction of a new industrial park in the Acadia Parish Industrial Park. This grant is in addition to the $700,000 that was previously awarded by the Louisiana Economic Development Agency (LEDA).

The LEED grant will be used to construct the new industrial park, which will provide a total area of 1,000,000 square feet. The park will include a 400,000 square foot industrial complex, a 100,000 square foot office building, and a 50,000 square foot research and development center.

The new industrial park will be located on U.S. 90, three miles west of Rayne, and will provide a significant boost to the local economy. The park will also create new jobs and attract new businesses to the area.
