ACADIANA AREA IS GROUP TOPIC

Briefing Session Is Held on USL Campus

A large group of area legislature, city and parish officials and other interested people gathered at the University of Southern Louisiana campus for a briefing and hearing session on plans for overall community development of south Louisiana and the Atchafalaya Basin.

The project, now known as the environmental development of this area, was a joint one between architecture students of the University of Southern Louisiana and the Environmental Research Development District.

Among those present for the briefing session, which included a film made by the fourth-year architecture students of Ronald Katz, was an assistant professor, were Senator Edgar D. Minton, Lafourche, and Francis A. L运河, New Iberia. Representative Lloyd O'Neal, Franklin, and other members of the council.

Katz said that the plans are based on a survey of the area and that the students have been working on them for the past year.

Mrs. Katz said, "We have been working on this for over a year, and we have a plan that we think will work."

During the briefing session, the students presented their plans, which include a master plan for the area, a plan for the Atchafalaya Basin, transportation plans, and a plan for the development of the Atchafalaya Basin.

"We have been working on this for over a year, and we have a plan that we think will work," Katz said.
