GOV. BILL WALLER has confirmed that he will sign a deed giving title to 26,000 acres of submerged land off Mississippi to the federal government for the state's part of the Gulf Islands National Seashore Park. The broken line around Ship, Horn and Petit Bois Islands represents the deeded area. The area would run from Mississippi to Florida. Waller, denying reports of "foot-dragging" on the signing, said he had delayed only to familiarize himself with plans for the project.
