NAVY PCF SWIFTS, the PT boat of the Viet Nam conflict, take their last whirl through the waters of Bayou Teche before shipment for duty in the South China Sea. The speedy craft, built by Sewart Seacraft at Berwick, are an adaptation of the fast crew boats which service offshore drilling operations. They have a top speed in excess of 25 knots. All-aluminum construction has greatly improved serviceability. Marine grade aluminum alloys are supplied by Reynolds Metals Company.
