THE TIMES-PICAYUNE, NEW ORLEANS, LA., THURSDAY MORNING, APRIL 20, 1972

STATE lands near the mouth of the Mississippi River is a vital shipping center, according to a new study by the Louisiana Superport Task Force.

The study, conducted by Louisiana State University's School of Business Administration, indicates that the establishment of a superport near the mouth of the Mississippi River could provide a significant economic boost to the state.

The superport would serve as a major hub for the transportation of petroleum and other goods, providing new job opportunities and increasing economic growth.

The study outlines the potential benefits of the superport, including:

- Improved efficiency in transportation and logistics
- Increased economic opportunities for local businesses
- Enhanced global competitiveness for Louisiana's economy

The research also highlights the need for careful planning and consideration of environmental impacts to ensure sustainable development.

The Louisiana Superport Task Force recommends the following actions to enable the establishment of a superport:

- Conducting further environmental studies
- Developing comprehensive plans for infrastructure development
- Engaging with state and federal agencies for support and funding
- Establishing partnerships with local and regional stakeholders

The report concludes that the superport has the potential to transform Louisiana's economic landscape, providing a strategic advantage in the global market.
