HOUSE NUMBER ONE
111 Miller Street
Owner: MR. & MRS. RICHARD E. KELLOGG
Architect: RICHARD E. KELLOGG, AIA
Builder: DOUG ASHY LUMBER COMPANY
The wooded site and the Louisiana climate, as well as family requirements of space and privacy on a limited budget, determined this design.

The cross-shaped plan provides internal privacy and helps zone the exterior into formal and informal areas. By angling the house on the lot, the west sun is avoided and privacy from neighbors is maintained, although large areas of glass admit light and view. Wide overhangs protect from sun and rain while allowing cross ventilation.

The wood structure is expressed throughout, on a 3'-4" square module, as a unifying rhythm.

HOUSE NUMBER TWO
304 Laurence Avenue
Owner: MR. & MRS. KERMIT R. ESCUDIER
(Formerly Mr. & Mrs. R. L. Zinn Residence)
Architect: DAVID L. PERKINS, AIA
Builder: MOISE ROYER
This house was designed from a strong program presented to the architect by the client. This program called for the house to be divided into three distinct areas: communal area (middle floor), children's quarters (upper floor), and adult living and sleeping quarters. The house is of wood frame construction and contains 2,400 square feet. The site orientation was dictated by the concept.

HOUSE NUMBER THREE
138 Acacia Drive
Owner: MR. & MRS. MANUEL TRAHAN
Architect: DON J. O'ROURKE, AIA
GERALD M. GOSSON, PE
JASON T. BENOIT, ASSOCIATE
Builder: DUDLEY MOUTON
The owners, both engaged in business careers, desired an open-type plan to promote an informal atmosphere for entertaining and to achieve maximum use of the space for family living.

The house is located on a river site and designed with two floors; the living areas at ground level and the bedroom core at the upper floor.

At the ground level, the open plan evolves about the fireplace as the core and opens out to a deck at rear facing the river with a completely glassed wall to help amplify and complement the interior spaces and offer an exciting view. At the upper level each bedroom opens out to a deck with different views. The play of spatial volumes and structural members was conceived to stimulate the viewer with every change of vantage points from both the interior and exterior.

HOUSE NUMBER FOUR
7 Oak Glen Road
Owner: MR. & MRS. JAY B. WHARTON
Architect: DAVID L. PERKINS, AIA
Builder: ALBERT GUIDROZ
This house was designed around detailed space requirements provided for the architect by the owner. It combines privacy and segregation between parent and children with flexibility for future family changes.

It features circulation in such a manner as to allow the general areas to be combined into a 65' open space broken only by changes in level and visual height obstructions.

The structure is steel frame with metal roof deck, and curtain walls. This house contains approximately 4,000 square feet and was so closely oriented to the existing site that only minimum excavation was necessary.

MODERN HOUSE DAY II
AN OPEN HOUSE TOUR
APRIL 2, 1967 1 P.M. TO 5 P.M.
LAFAYETTE, LOUISIANA
USL STUDENT CHAPTER OF THE
AMERICAN INSTITUTE OF
