A List With Short Description of the More Than 600 VARIETIES OF CAMELLIAS in the Home Grounds (Jungle Gardens) of E. A. McILHENNY

AVERY ISLAND LOUISIANA
This camellia list covers the named varieties of this beautiful winter-blooming shrub, now growing in the home grounds of E. A. McIlhenny, at Avery Island, Louisiana.

This unparalleled collection represents years of research, and the bringing together of these plants from all the camellia-growing centers of the world, at great effort and expense.

There is, in the camellia, great variation in both plant and blossom, which makes it impossible for the average horticulturist to determine the correct name of the many varieties from written description alone. This fact has caused many nurserymen, now offering camellia plants for sale, to send out plants incorrectly named, thereby often causing camellia fanciers to purchase the same variety under a number of different names.

For those who wish to own correctly named camellias the McIlhenny Collection is of great value, for it is available to those who wish to compare the blossoms of the camellias they now have, and learn definitely their correct names.

Every variety listed can be secured on orders placed for specific varieties before or during the grafting season, which is from January 15 to March 1.

Many of the common varieties are carried in stock, but the rare and scarce varieties are grafted specially, and only to fill specific orders.

My method of grafting is to use three- to six-year-old, vigorous, blooming plants for the understock, putting the graft in at the root. This method produces a strong, bushy, blooming plant, three to four feet tall at two years from the graft, assuring the purchaser a blooming plant of attractive size one year after delivery. No plants are delivered until the graft has completed one full summer-growing season.

My charge for grafting camellias is:
$7.50 per plant if grafted on three-year-old stock.
$10.00 per plant if grafted on four-year-old stock.
$12.00 per plant if grafted on five- to six-year-old stock.

One-half is payable when the order is placed, the balance to be paid before shipment is made. All prices are f. o. b. Avery Island.

Should a customer desire their grafted plant carried in the nursery for a second summer's growth before shipment, an extra charge of $2.00 per plant is made for this service.

Delivery of all plants in good condition to the transportation company is guaranteed.

Should a plant ordered to be grafted fail to take, or die before delivery to the customer is made, all advance money will be refunded.

In describing the shape of camellia flowers:
Single—denotes one or two rows of petals.
Semi-double—more than two rows of petals.
Imb.—Petals smoothly shingled, very double.
Full double—some petals imbricated, some irregular.
Peonytype—double, with irregular petals.

E. A. McILHENNY,
Avery Island, La.
1. **CAMELLIA THEA**
Thea—Five petal, SINGLE WHITE. Prominent yellow stamens.

2. **CAMELLIA RETICULATA**
Reticulata—Large, semi-double, late bloomer. ROSE COLOR.

3. **CAMELLIA ROSEAFLORA**
Roseaflora—Very small bloom, fully imb., ROSE PINK.
Roseaflora Floreplena—Very double. Small blossom and foliage. LIGHT PINK.

4. **CAMELLIA JAPONICA**
Abundance—Attractive PURE WHITE. Double, loosely petaled.
Adelina Patti—Single type. PINK at base, shading to WHITE at tips.
Adolphe Audusson—Finest semi-double LIGHT RED. Prominent stamens.
Adrien Lebrun—Extremely double, symmetrical. DEEP ROSE.
Adzuma-shibori—Full double, fine. SCARLET with WHITE spots.
Ainfo Egeria—PURE WHITE, small, very double blossom.
Aka-sumikura—CRIMSON, full double.
Aka-takukai—ROSE, very small. Single.
Akebono—Single flower, soft FLESH color.
Akebono Pink—Semi-double. DEEP ROSE PINK.
Akebono Variegated—Small, semi-double. WHITE lined with ROSE.
Aki-no-yama—Double, large flower. CRIMSON.
Albaplena Cassoretti—Imb., large, full double. PURE WHITE.
Alba Plena—WHITE, very double opening flat. Petals irregular.
Albaplena Minor—Small double blossom with small petals. WHITE.
Allen—Semi-double. WHITE shading to YELLOW at base.
Aloha—Peony type, in a dark SALMON ROSE.
Altheaflora (G. S.)—Large, peony type. Uniform DEEP RED, tipped BLACK.
Altheaflora—Peony type, varying color, PINK to WHITE.
Amabilis—Small, single. WHITE at base, broadly mottled ROSE RED.
Amabilis Variegated—Single. LIGHT ROSE with DEEP ROSE stripes.
Ama-no-kawa—WHITE, incurved double petaled. Large flower.
Ama-no-shita—RED, with WHITE variegation. Single.
Americana—Full double, imb., WHITE with PINK and RED stripes.
Angelo Botti—Small double. FLESH PINK lightly flecked LIGHT RED.
Angelo Cocchi—Imb., full ROSE PINK. Medium sized.
Anna Bruneau—Full double. LIGHT PINK with few WHITE blotches.
Anna Frost—Semi-double. ROSE PINK veined with DARK RED.
Apollo—Five petal, single. Prolific bloomer. ROSE RED.
Ara-jishi—Full double, SCARLET.
Arnalda de Bresia—Imb., DEEP ROSE base, tipped ROSE and WHITE.
Auguste Delfosse—Small, DEEP PINK suffused with PURPLE cast. Imbricated.
Aurora—Large, single. ROSE MAddER PINK.
Aya-nishiki—Single, CRIMSON variegation on WHITE.
4. CAMELLIA JAPONICA—(Continued)

Baronne Leguay—Imb., CHERRY ROSE. Color lighter at center.
Beaute de Nantes—Imb., FLESH ROSE with lighter center.
Beautiful—Full double. Two colors on plant varying from LIGHT ROSE to WHITE.
Bella d’Arglione—Imb., CARMINE ROSE, lightly striated at center.
Bella Lambertii—DARK RED. Full imbricated.
Bella Romana—Imb., ROSE streaked with VIVID CARMINE.
Belle Jeannette—Very large double. RED and WHITE variegated.
Belle Judita—Imb., WHITE.
Belle Rose—Large, single. DEEP ROSE PINK.
Belliformis Nivae—Imb., PURE WHITE.
Beni- kirin—CRIMSON, large peony-flowering.
Beni-korako—Full double, very large. ROSE RED.
Benten—RED, single flower. Yellow margined leaf.
Bicolor—PINK and WHITE, equally divided large blossom.
Bicolor de la Reine—Imb., WHITE background, shaded ROSE, bordered WHITE.
Biho—Cup-shaped, slightly flushed with FLESH.
Black Prince—Roseforme, regular. Color DEEP CARMINE RED.
Blushing Bride—Small, very double. PURE WHITE dashed LIGHT RED.
