Parochial School Policy
Statement Issued Here

So that the position of the Catholic schools on integration might be better understood, especially in relation to the procedure followed in recent years, the following statement has been issued:

"First of all, the entrance by any child into a Catholic school is based on the freedom of choice in education guaranteed by the Constitution. Nonpublic schools in this country could not exist without such freedom. Whenever a child enters a parochial school he exercises a fundamental freedom to select the school of his own choosing."
