HISTORY

The history of rice, and of Crowley are interwoven. The museum tells the history of rice to the present by means of pictures and written history. Indoor and outdoor tool and machinery displays complete the story. A working model of a rice mill demonstrates the rice milling process. One room is devoted primarily to the history of this area. Consequently, one room of the museum is devoted to the oil industry. The Acadian Room contains old Acadian bedroom, dining and kitchen furniture and accessories.
